

TURBOFARMER II

Merlo's factories in San Defendente di Cervasca (Cuneo) cover an area of 300,000 m² (with 220,000 m² indoor facilities)

1. Merlo SpA main offices
2. Final assembly lines
3. Lines for assembling components and cabs
4. Moulding of technopolymers
5. Automated storing and shipping centre
6. Machines plus attachments shipping centre
7. Final quality control
8. Technological centre
9. Steel and structural assembly lines centre
10. 3M attachments
11. CFRM (Training & Research Centre)

The Merlo Group

N° 1 for technology and safety

The Merlo brand has always been synonymous with advanced technology in the telehandler field and our history, since 1964, is hallmarked by experience based on determination and passion. The development of complex products, from the idea to the result, from design to sales, means being able to propose orientations for the most competitive markets. The outcome of our efforts are compact, easy to handle telehandlers ensuring incomparable operating performance, comfort, efficiency and safety. At Agritechnica 2013, three important awards were received that clearly demonstrate the technological and innovative superiority of our products:

- Turbofarmer 42.7 Hybrid: Gold Medal for innovation at Agritechnica.
- Turbofarmer II: Machine of the year 2014 in the "handling and logistics" category.
- Multifarmer: Selected as a "milestone" in agriculture.

The new modular Medium Duty and Compact Turbofarmer range was named «Machine of the Year» 2015 at Sima 2015 in the handling and logistics sector.

- Over 1.100 employees
- Surface area of 300,000 m² of which 220,000 m² are indoors
- 90% exports
- 600 dealers all over the world
- 8% of turnover invested in Research & Development
- 54 manufacturing robots

Automated boom bending workstation

Roto robotised welding of the chassis

Merlo, the inventor of the telehandler and its application in agriculture, presents the Turbofarmer II range

Modular Turbofarmer range

The telehandler in agriculture according to Merlo

We were the first to launch a range of telehandlers dedicated to agriculture in 1996.

Today, we proudly present the new generation developed on the strength of experience acquired in 50 years of operations.

- + Comfort**
 - ✓ Largest cab in its category
 - ✓ Suspended cab (CS), a unique and patented solution
 - ✓ Pressurized cab*
- + Performance**
 - ✓ 136 HP engines (Euro Stage IV - Tier 4 Final) without DPF
- + Efficiency**
 - ✓ -18% consumption with standard Eco Power Drive (EPD)
- + Versatility**
 - ✓ Frame levelling and boom lateral movement system (TT version)
 - ✓ Mechanical PTO (optional)
- + Safety**
 - ✓ Cab compliant with ROPS and FOPS level II standards**
 - ✓ M CDC - Merlo's Dynamic Load Control

* According to the ISO 10263-3 standard, models with Load-Sensing, not approved for pesticides.

** EN ISO 3449/2008, protection level II (highest protection level provided by the norm and equivalent to the fall of a 227 kg object from 5.22 metres)

- CS - suspended cab: the only one in its category
- EPD -18% consumption
- TT versions: versatility and precision, not found anywhere else
- 4.2 tons at 7 metres (version P 42.7 TT)

New Merlo Turbofarmer family

Concentrated technology

Comfort

- Largest cab on the market 1010 mm
- Standard cab on silent-block
- CS cab with hydropneumatic suspensions

Hydraulic system options

- Load-Sensing (LS) pump with electromechanical joystick
- LS Pump + Flow-sharing + Electromechanical joystick or electronic optional (standard on CS)

Efficiency – Powertrain

- Tier 4 Final engine 136 HP
- Merlo 2-speed hydrostatic transmission
- CVTronic transmission (dedicated versions, CS and TT)
- EPD - standard on all versions, EPD Top as an option.

Innovative Merlo systems

- Tilting + lateral movement of the boom
- Tac-Lock rapid coupling of the attachments

Lifting capacity

- Booms from 7 to 10 metres
- Capacities ranging from 3.8 to 4.2 tons

Safety

- M CDC - Merlo's Dynamic Load Control
- Cab compliant with FOPS/ROPS

Towing versatility

- Tow hook up to 21 tonnes
- Drawbar
- Hydraulic connections (2 opt.)
- Trailer braking (Pneu/Hydr.)

Versatility in the field

- Mechanical PTO (optional)
- Speed 540/1000

The Turbofarmer range

A version for every requirement

● As standard. ○ On request.

Broad product offering:

- Available in 2 models and 12 different versions
- 2 boom lengths - 7 and 10 m
- 2 capacities - 3.8 and 4.2 tons
- 1 engine available 136 HP Tier 4 Final

A close-up photograph of a bright green tractor, specifically a TurboFarmer model, with a large, messy pile of harvested straw or hay resting on its black engine hood. The straw is piled high, reaching up towards the tractor's cab. The tractor's body is a vibrant green, and the word 'TURBOFARMER' is printed in white and green on the side of the hood. A black plastic component, possibly a headlight or sensor housing, is visible on the right side of the hood. The background shows a blurred view of a farm or rural area with some buildings and trees under a clear sky.

Fan Drive as standard on the entire range.
Radiators always clean

TURBOFARMER

Engines & Transmissions

Higher performance and lower consumption

- ✓ The Turbofarmer range is equipped with a Tier 4 Final engine 100 kW/136 HP 3.6 litres at 2300 rpm, torque 500 Nm at 1600 rpm
- ✓ Two hydrostatic transmissions are available: two speeds and a unique stepless Merlo CVTronic
- ✓ Merlo's hydrostatic transmissions have an oil circuit that is completely independent of the boom's oil circuit resulting in assuring maximum performance and longer oil's life (with two separate tanks)
- ✓ Fan Drive **1** is a standard feature that allows you to change the rotation direction of the fan, from suction to blowing
- ✓ Eco Power Drive (EPD) is a standard feature that automatically controls the engine speed when driving, according to operating conditions. Moreover, EPD Plus, also standard, adds Heavy Load Eco **2** and Speed Control **3** modes capabilities
- ✓ Speed control mode allows the forward speed of the machine to be memorized and to keep it constant (ideal for yard handling operations or road transport)
- ✓ All models with an electronic joystick (standard on CS) has the EPD Top system, which adds to the EPD Plus version the automated control of the diesel revs according to the movement of the joystick. The greater the inclination given to the joystick, the higher the rpm of the engine
- ✓ The rpm selector **4** allows the operator either to set minimum engine speed to be kept (selector in position **A**) or to set a maximum engine speed while operating the joystick in proportional inclination mode (selector in position **B**)

- Tier 4 Final 100 kW/136 HP engine
- Fan Drive as standard to ensure the radiators are always clean
- EPD system: consumption is reduced by 18% compared to traditional technologies
- EPD Top guarantees boom responsiveness while keeping consumption to a minimum

New Merlo CVTronic transmission.
Accelerations without interrupting torque
and without stopping to change gear
from 0 to 40 km/h

Merlo CVTronic

Merlo's own continuous variable transmission version

The CVTronic transmission follows Merlo's traditions in the hydrostatic field and ensures smooth acceleration without interrupting torque from 0 to 40 km/h.

The transmission comprises two axial piston hydrostatic motor (2X) powered by the electronically-controlled hydraulic pump.

At low work speeds, they function in conjunction to provide maximum torque, with an increase of + 12% with respect to conventional hydrostatic transmissions.

During transport, the second hydrostatic engine is automatically disengaged from the control system and the oil from the pump powers the main hydrostatic motor that pushes the Turbofarmer to maximum speed.

Merlo CVTronic technology + EPD

- Over 12% torque increase at low work speeds vs conventional hydrostatic transmissions
- Accelerations from 0-40 km/h, smooth and progressive without interruptions for a gear change
- 18% fuel consumption reduction thanks to the EPD system

Standard cab

Largest cab in the category

1. Joystick with reverse shuttle (duplicated on steering wheel); ergonomic and easy to use.
2. Effective heating/cooling ventilation system.
3. Inching-Control: expanded sensitivity for creep movements.
4. Curved windscreen: maximum visibility and safety in work at height.
5. Merlo CDC Light.
6. Glovebox.

Comfort record

World exclusive cab with suspensions

[Pressurized
cab*]

The new cab was developed to ensure record-breaking comfort for our users.

At 1010 mm, it is the largest in its category, yet even acoustic and thermal comfort involved detailed design; the cab is also pressurised* to prevent dust entering the cockpit.

The air flow has been specially designed for being distributed evenly inside the driver's cab and reach all areas in an optimal manner. The optional air conditioning system is completely new and was developed based on automotive standards, halving the warm-up and cool-down times, guaranteeing an optimal temperature in all conditions. The new Merlo cab can now reach an internal temperature of 22°C with an external temperature of 43 °C and full sunlight and an internal temperature of 26°C with an external condition of -15 °C and no solar irradiation.

The inlet vent is located on the side of the cab away from potential sources of dust and dirt.

Moreover, it is also available a suspended cab, something only Merlo offers in the field of telehandlers: the pneumatic suspensions provide the best comfort in its class.

AIR FLOW VENTILATION SYSTEM

CS hydropneumatic suspended cab which can be activated by the operator. The only one of its kind on the market.

BSS hydropneumatic suspension of the boom (optional), which can be activated by the operator, automatically deactivates under 3 km/h to ensure maximum precision in the positioning of the loads.

Pneumatic seat for improved comfort.

- 1010 mm wide. The cab is the largest in its category
- 8 versions equipped with CS suspended cab
- - 3 dB of interior noise; sound levels halved in comparison with the previous generation of machines

* According to the ISO 10263-3 standard, not approved for pesticides.

Premium cab

Feel like
in your car

The standard cab and the Premium cab are dimensionally identical and both compliant with the highest safety specifications ROPS and FOPS (level II). The Premium cab it is a perfect match for customers looking for automotive interior cab finishing. In fact it fits all uprights covered by finishing, new designed steering wheel and roof sun-blind. Air condition and five automatic ventilation flows selection are available as an optional in all models. Merlo CDC display, joystick type and EPD control type are features that enrich the product content of the Turbofarmer range and can be standard or optional depending on specific model configuration chosen. Moreover in the Premium cab the outside rear top spoiler (that eventually lodge the air conditioning system) matches colorwise Merlo's green. Please ask your local dealer for more details.

CDC - Merlo's Dynamic Load Control

Safety as standard for everyone

The Merlo Group considers safety as an absolutely essential value and this is why it invented the M CDC system. The objective is to allow every operator to work in total safety by fully exploiting the potential of the telehandler and the equipment used. The operator can check at any time the dynamic stability of the vehicle, thanks to the dot **3** on the screen in the M CDC Display (optional) or the traffic light on the front upright in the M CDC Light version.

For manoeuvres that may give rise to a telehandler stability risk, the M CDC system will block the boom and prevent any further movements that may worsen the situation.

CDC Display*

All the safety information is clearly shown in the colour awesome 8.5" display. An indicator on the load chart informs the operator about the dynamic stability of the telehandler and the M CDC avoids risks for the longitudinal equilibrium of the balance by blocking boom movement if needed.

- 1.** Equipment in use
- 2.** Boom work area
- 3.** Current boom-load positioning (represented with a colored dot)
- 4.** Load detection menu
- 5.** Operating parameters
- 6.** Work information
- 7.** Stability index

* A Merlo unique feature available as an option in all models.

Boom handling: speed and precision **précision**

Merlo precision and technology

Being unique is our trademark

Merlo produces the booms mounted on its telehandlers in-house and has developed unique technologies to make them strong yet lightweight, protect handling mechanisms against accidental blows and allow users to position the load in the most precise manner possible.

- ✓ Boom sheet metal welded on the boom's neutral bending axis
- ✓ Cartridge protected handling system inside the boom, thanks to a patented solution that is easy to access if maintenance is needed
- ✓ Tac-Lock: hydraulic attachment clamping system from the cab
- ✓ Tilting: system for correcting tilt, built into the chassis, allowing the operator to correct ground slopes and work in complete safety
- ✓ Movement: the boom can be moved sideways by the operator so that the load can be positioned with maximum precision, comfort and time-saving. Shift range **530 mm**.

WORKING TIMES	seconds
ASCENT	6.6
DESCENT	5.5
EXTENSION	5
RETRACTION	3,3

- Lighter but stronger booms: automated welding on the neutral axis, area with less strain
- Extension mechanism well-protected inside the boom
- TT versions: unique tilting and boom lateral movement system

One telehandler,
a multitude of applications

PTO coupling selector

Towing hooks & PTOs

Telescopic versatility!

We are determined to ensure that Merlo telehandlers are increasingly multi-purpose in order to maximise return on investment for our clients. The new Turbofarmer range takes this concept to even higher limits. As well as conventional handling, logistics and maintenance applications typical of telehandlers, the new Turbofarmers allow you to use them even for towing, thanks to the towing hook type-approved for 21 tons and the pneumatic and hydraulic trailer braking system. Moreover a mechanical PTO is available as an optional to allow towing operations with *unifeed* mixer trucks, rotary balers, seeders and sprayers.

- Towing hook of 21 tons with pneumatic and hydraulic braking
- Rear hydraulic connections
- Braking system, hydraulic or pneumatic
- Mechanical PTO 540/1000 that can be selected from cab
- Net power at the PTO 115 HP

New Turbofarmers,
the best ground clearance

460 mm
ground
clearance.
405/70-24
tyres

Axles and brakes, effective and efficient

Real benefits

Our Turbofarmer telehandlers are equipped with axles that have been conceived, designed and constructed in-house. There are two types, both made of cast iron and with cascade reducers, for which we assure sturdiness, excellent steering performance and “best in class” ground clearance.

All of our Turbofarmer telehandlers are equipped with 4 dry disc brakes that allow for consistent reduction of friction and, thus, fuel consumption in comparison to oil bath discs.

The parking brake is automatically engaged when the engine is switched off.

The operator can also engage it at will when the engine is running for stationary work on slopes. Ground clearance from 460 to 510 mm (405/70-24 and 460/70-R24 tyres) to nimbly get around any obstacles.

CRAB STEERING

Parking brake selector
and steering mode
selector

- Axles conceived, designed and produced in-house by Merlo
- Up to 510 mm clearance off the ground, the best in its category
- Three steering modes
- Dry brakes to reduce friction and consumption
- Automatic parking brake system engagement as engine switches off

Automatic equipment recognition as standard

Merlo CDC system features an advanced and smart sensor that automatically recognises the attachment fitted and consequently calibrates its performance in relation to specific load charts.

Sensor on the attachment

Sensor on the carriage

**Merlo attachments,
many solutions in a single handler**

Developing multi-purpose solutions

More efficiency and productivity thanks to Merlo design

Merlo adopts simple and effective guidelines in the evolution of its products.

From conception to development, everything is studied, designed and created in the Group's research centre. This simple "rule" also applies to attachments.

Backed by years of experience, Merlo's engineers have developed a wide range of attachments, divided by type and load capacity.

This way of working makes possible to offer a wide portfolio of well tested and interchangeable equipment that save time and fatigue.

TRAINING CENTRE

The Merlo Training and Research Centre (CFRM) has made safety training and instruction in the use of the machine its mission. The CFRM provides training courses for operators of person-carrying overhead platforms, forklift trucks, telehandlers, cranes, earth-moving machinery, agricultural and forestry tractors, snow ploughs and urban cleaning vehicles.

Countries where Merlo is a market leader

MOVIMATICA MERLO INFOMOBILITY

Is the new system, conceived and built within the Merlo Group, for managing vehicles remotely: it enables GPS radio-localisation in real time, monitoring operation and use, receive and manage malfunction or burglar alarms and also send commands for handling events via the internet.

THE MERLO WORLD

In a globalised world, **the customer always comes first!**

From excellent products to excellent service. In 2008, Merlo has adapted its production process to meet the needs of the ISO 9001 quality control system. The process is perfected and improved continuously.

At the same time, the foundations have been laid to put the Customer first, implementing investments aimed at Services such as Financing, Aftersales training, Spare parts and Telematic Means such as remote diagnostics, thanks to the Merlo Mobility project.
